Treating the Individual with Ataxia - using an NDT approach

This workshop will explore primary impairments present in the individual with ataxia, current theoretical evidence and treatment strategies using a NDT approach. The overall objective of this workshop is to provide clinicians with knowledge and skills they can use in treating the individual with ataxia to promote positive functional outcomes.

Instructor: Karen Guha, PT, C/NDT, NDTA™ Coordinator Instructor, CIDN

Registration will be open to physiotherapists, occupational therapists and rehabilitation assistants working in stroke in the Champlain Region.

An email will be sent when registration is open.
